

Hanling Tian

hanlingtian@sjtu.edu.cn | (+86) 18905258081

Personal Profile:

I received M.Eng. from Shanghai Jiao Tong University and B.Eng. from Xi'an Jiaotong University. My courses focus on mathematics, programming, and scientific computing. My research aims to improve computational efficiency, stability, and reproducibility for scientific computing and software. This research does not involve military use, classified information, or restricted government projects.

Education:

Shanghai Jiao Tong University, Shanghai, China Sep. 2023 – Mar. 2026

Master of Engineering, Control Science and Engineering

Grade Point Average: 3.83/4.00

- o Relevant courses: Numerical Analysis (A), Scientific Writing (A), Convex Optimization (A-), Stochastic Methods (A+), Mathematical Statistics (A-).
- o Research interests: scientific computing, optimization, graph, computational evaluation.

Xi'an Jiaotong University, Xi'an, China Aug. 2017 – Jul. 2023

Bachelor of Engineering, Automation

Grade Point Average: 4.11/4.30; Average Grade: 94.15/100

- o Relevant courses: Mathematical Analysis (98), Linear Algebra (98), Complex Analysis and Integral Transforms (100), Probability & Statistics (96), Signals & Systems (96), Computer Programming (95).
- o Honors: Outstanding Graduate.
- o Honors Youth Program, 2017–2019, before traditional undergraduate study (2019–2023).

Publications and Patents:

List of all publications:

- o **H. Tian**, Y. Liu, M. He, Z. He, Z. Huang, R. Yang, and X. Huang. *Simulating Training Dynamics to Reconstruct Training Data from Deep Neural Networks*. ICLR 2025.
This work studies information retention behaviors in computational systems from a theoretical analysis perspective.
- o M. He, R. Yang, **H. Tian**, Y. Qiu, and X. Huang. *Primphormer: Efficient Graph Transformers with Primal Representations*. ICML 2025.
I am the 3rd author, and my work focused on language polishing, formatting checks, and reference consistency.
- o Z. Huang, Y. Liu, B. Lin, Y. Lou, Z. He, **H. Tian**, T. Li, and X. Huang. *RAIN-Merging: A Gradient-Free Method to Enhance Instruction Following in Large Reasoning Models with Preserved Thinking Format*. ICLR 2026.
I am the 6th author, and my work focused on reference checking.

Publication statement: All listed publications are public academic publications. They are civilian studies and do not involve military use, classified information, or restricted government projects.

List of patents: None.

Awards, Interests, Skills, and Community Involvement:

Skills: Python programming, scientific computing, optimization, academic writing.

Languages: Mandarin Chinese and English.

Professional organizations and community involvement: None.
